

Woodoc Penetrating Weatherproof Wax Specification Sheet

Typical Application:

A liquid penetrating weatherproof wax with ultra-violet filters for sealed/treated exterior wood. The product treats wood effectively in spite of the presence of waxes, oils, varnishes or sealers. Wood should first be sealed with a Woodoc Exterior Sealer. **Note: If the product is used on wooden decks or – staircases, apply very sparingly as the surface can become slippery.**

Product Features:

Woodoc Penetrating Weatherproof Wax penetrates the existing sealer or coating to feed the wood. The wax content helps exclude moisture, whilst the UV-absorber replenishes the sealer's UV-resistance.

- Enhances the protection of wood against seasonal and environmental changes.
- Brings out the natural colour and grain of wood.
- Revitalises the surface coating, cleaning and refreshes it.
- Non-toxic when dry.
- Compatible with most varnishes, sealers and finishes.
- Unlimited shelf life.
- Complete how-to-use instructions on label.

No: WDpwwax/003

Dated: 03/08/15

Name:

Woodoc Penetrating Weatherproof Wax

Description:

Exterior maintenance and refurbishing wax.

Coverage:

Dependant on application.

Application:

By brush or cloth.
